

# Pulse Atlas

Fictional product brief for Source to Motion demonstration.

These numbers are synthetic test data, not a real company claim.

Pulse Atlas is an incident analytics dashboard that turns incoming events into an actionable response queue.

## **Last 30 days**

2,480 events processed in the last 30 days.

97.4% of incoming events were auto-tagged in the last 30 days.

Median response time was 12 minutes in the last 30 days.

Signals become triaged incidents, then owners receive a response card.
